

Wastewater Microbiology Classes

These classes are not available as free content. They are taught by Steve Leach from Leach Microbial Consulting. He's got some fantastic resources on his website at <https://www.leachmicrobial.com>

In addition to the three classes shown below, Steve conducts an in-person, hands-on microscope class for us once or twice a year. Learn more here: <https://www.indigowatergroup.com/wastewater-microbiology-process-control/>

WWT-012A - Activated Sludge Microbiology: A View Beneath the Surface

WWT-012B - Activated Sludge Microbiology: Microscope Basics and the Micro Exam

WWT-013 - Activated Sludge Microbiology: Filaments and Settling Problems
